CORROSION OF COPPER NICKEL ALLOYS IN SEA WATER. [1963] [7p] 5refs C. E. Trans. 2805.
Order from OTS or SLA $1.10 63-24085

Trans. of [Izvestiya Vysshikh Uchebnykh Zavedenii]. Tsvetnaya Metallurgiya (USSR) 1961, v. 4 [no. 4] p. 145-148.

DESCRIPTORS: Sea water, *Nickel alloys, *Copper alloys, *Corrosion.

A study was made of the corrosion and electrochemical behaviour of copper nickel alloys in sea water. It is shown that when the alloy contains about 20% of nickel a resistance threshold is exhibited and at this point the properties of the alloy change abruptly. Measurement of the potentials of cleaned specimens shows that the occurrence of a resistance threshold is the result of an increase in the degree of passivation of the alloy. (Author)
